Paperback. Book Condition: New. Not Signed; George Dyson's fascinating account of the early years of computers: Turing's Cathedral is the story behind how the PC, ipod, smartphone and almost every aspect of modern life came into being. In 1945 a small group of brilliant engineers and mathematicians gathered at the Institute for Advanced Study in Princeton, determined to build a computer that would make Alan Turing's theory of a 'universal machine' reality. Led by the polymath emigre John von Neumann, they created the numerical framework that underpins almost all modern computing - and ensured that the world would never be the same again. George Dyson is a historian of technology whose interests include the development (and redevelopment) of the Aleut kayak. He is the author of Baidarka ; Project Orion ; and Darwin Among the Machines . Unusual, wonderful, visionary . (Francis Spufford, Guardian ). Fascinating,the story Dyson tells is intensely human.a gripping account of ideas and invention. Fascinating,the story Dyson tells is intensely human.a gripping account of ideas and invention. ( Jenny Uglow ). Glorious.as much a story of the personalities involved as of the discoveries they made, and you do not need any knowledge of computers or mathematics to enjoy the ride. .a ripping yarn . (John Gribbin, Literary Review ). book.
