Rowman & Littlefield. Paperback. Book Condition: new. BRAND NEW, Handbook of Special Education, Alberto Marcos Bursztyn, This book introduces readers to key concepts and issues in the evolving field of special education. Arguably, over the past thirty years, no other area of education has been as radically transformed as the provision of services to children with disabilities. Since the mid 1970s, special education has steadily grown to reach fully 12% of the U.S. student population in grades K-12, and millions of children from birth to age five. Despite its promise of equal access, special education has become a controversial field in many respects. Critics point to its high cost, questionable pedagogical effectiveness, and differential outcomes across localities, family income levels, and ethnicities. The more typical approach in the literature highlights the legal and procedural mandates that dominate the discourse on educating the disabled student, but fails to explore the underlying assumptions and inconsistencies that make this area of education a controversial and still unsettled enterprise. This handbook departs from the traditional books in this field by focusing on the ways that special education policies and practices are enacted, rather than highlighting only their intended outcomes. Contributors to this text focus on defining commonly used terms and professional jargon in order to give interested readers access and insight into the field of special education and its associated practices. Some of the subjects included in this volume are the history of special education, disability and society, law and special education, pedagogy, policies and practices, and research in special education.
