## Report of the State Geologist on the mineral industries and geology of certain areas of Vermont

By Vermont. Office of the Geologist

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 144 pages. Dimensions: 9.7in. x 7.4in. x 0.3in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1921 Excerpt: . . . of high land which forms the northern end of the Taconic range. On the west and northwest the spur is bounded by the valley of the Lemon Fair River, which is a southward extension of the Champlain lowland between the Taconic hills. On the east and northeast the spur is bounded by the low, swampy flood plain of Otter Creek, along which the Champlain lowland merges with the Vermont valley. The spur falls off gradually in altitude northward into the low schist ridge of Whiting, which is flanked on the east and west by limestone. There are certain structural features both within the spur and along its margins which will be described in detail beyond. General geological features. As one passes eastward from the lake region through the Taconic range towards the Green Mountains the confusion in field relations and the difficulty of interpretation increase. The...
