In about six weeks their wings are strong enough to carry them to the top of a high fence or among the branches of a tall tree. The mother bird talks to her babies with a soft crooning note when all is well, but when danger comes her sharp *Quit!* *Quit!* bids them seek shelter. Ordinarily Mrs. Turkey is very shy and timid, but if danger threatens her young brood she will fight the enemy, even though it be a dog, until every feather is torn from her body. The eggs and the flesh of the turkey are used for food, feathers used for making feather dusters. Comparisons with goose: Turkey. Head bare; bill, short, strong curved; legs, dark colored, covered with false scales; feathers, large, coarse; body, flat; eggs, spotted;...

Complete guide! Its such a great study. I am quite late in start reading this one, but better then never. It is extremely difficult to leave it before concluding, once you begin to read the book.

A superior quality book along with the font employed was exciting to see. It is one of the most amazing book i have got read through. You wont really feel monotony at anytime of the time (that's what catalogs are for about in the event you ask me).
