Springer-Verlag GmbH Sep 2010, 2010. Buch. Book Condition: Neu. 23.5x15.5x cm. Neuware - A Mathematician Said Who Can Quote Me a Theorem that's True For the ones that I Know Are Simply not So, When the Characteristic is Two! This pretty limerick first came to my ears in May 1998 during a talk by T.Y. Lam 1 on field invariants from the theory of quadratic forms. It is poetic exaggeration allowed-a suitable motto for this monograph. What is it about At the beginning of the seventies I drew up a specialization theory of quadratic and symmetric bilinear forms over fields [32]. Let  $K$   $L$  be a place. Then one can assign a form  $(\cdot)$  to a form over  $K$  in a meaningful way if it has 'good reduction' with respect to (see 1.1). The basic idea is to simply apply the place to the coefficients of, which must therefore be in the valuation ring of. The specialization theory of that time was satisfactory as long as the field  $L$ , and therefore also  $K$ , had characteristic 2. It served me in the first place as the foundation for a theory of generic splitting of quadratic forms [33], [34]. After a very modest beginning, this theory is now in full bloom. It became important for the understanding of quadratic forms over fields, as can be seen from the book [26] of Izhboldin-Kahn-Karpenko-Vishik for instance. One should note that there exists a theory of (partial) generic splitting of central simple algebras and reductive algebraic groups, parallel to the theory of generic splitting of quadratic forms (see [29] and the literature cited there). 192 pp. Englisch.
